The VEB 21 converts a normal workstation PC into a full fledged Paging Station with additional features that never before could an ordinary paging console do. The operator now could make zone selection either from a graphical map or floor plan to assist the operator visually or from the GUI layout, similar to a paging console for button selection. The Text Streaming feature allows announcements to be entered in text, real-time or pre-stored. The text will then be synthesised into human voice and broadcasted.

Text streaming assures that all announcements made are consistent in voice, pronunciation, rate of speech and loudness. VT 61 paging gooseneck microphone to be connected to the audio input of the PC is available for use with the VEB 21.

System Requirements

	VEB 21
Operating System	Microsoft Windows XP Professional SP3 Microsoft Windows 7 Professional Microsoft Windows Server 2003 Microsoft Windows Server 2008
System Requirement	.Net Framework 3.5 or above
CPU	Intel Core 2 Duo 2.0 GHz or above
Memory	2 GB or above
Hard Disk	80 GB or above
Required Ports	1 no. of Wired Network Interface (Network Interface Card with PCI slot is recommended)
Media Drive	CD-ROM Drive
Display	1024 x 768 High Color, 32 bit
