

Presenting the VEB 601-S, an innovative device designed to extract a single channel of audio from the network and seamlessly convert it back to analog audio. This transformed audio can be effortlessly fed into AEX SYSTEM's diverse range of power amplifier models. With each unit possessing a unique IP address, users have the flexibility to receive audio from their desired source, ensuring a tailored and personalized audio experience. The versatility of the VEB 601-S extends further with remote gain control capabilities. Through the intuitive Network System Manager, users can

easily and remotely control the gain settings via the network. This feature enhances user convenience, providing a centralized and efficient means of managing audio output levels. Whether adapting to specific audio sources or fine-tuning gain controls, the VEB 601-S stands as a cutting-edge solution, integrating seamlessly into audio systems for optimal performance and control.

VEB 601-S

#### Technical Specification

	<b>VEB 601-S</b>
<b>No. of Channels per unit</b>	1 Channel
<b>Line Out Audio Level</b>	0 dBV (600Ω Balanced)
<b>Audio Format</b>	CD Quality BGM Audio Codec
<b>Frequency Response</b>	20Hz - 20kHz
<b>Signal to Noise Ratio</b>	>105dB
<b>Total Harmonic Distortion</b>	<0.05%
<b>Network Interface</b>	RJ 45,10/100 Mbps Ethernet TCP/IP
<b>Indicators</b>	Power, 1 nos.Analog Link & 1 nos. ATT OVR
<b>Control Output</b>	1 nos. ATT OVR & 1 nos. Control Output (user programmable)
<b>Power Requirements</b>	24Vdc (Regulated), 1A (Fuse:1.0A)
<b>Material &amp; Finish</b>	Mild Steel Casing, Epoxy Coated Textured Black
<b>Dimensions</b>	215 x 44 x 150 mm (W x H x D)
<b>Weight</b>	1.3 kg
